SHORT COURSE ANNOUNCEMENT

PROJECT FINANCE

1.0 COURSE BACKGROUND

Project finance is used on a global basis to finance over billions of capital intensive projects annually in industries such as power, transportation, energy, chemicals, and mining. At the end of the course participants will be able to learn how to:

- Develop your understanding of the difference between project finance and other corporate debt financing alternatives
- Become confident in assessing the risks in a project and how those risks are typically mitigated
- Learn about the structure of financial statements within a financial project and the evaluation of the key drivers of financial performance, understand how debt and equity providers evaluate the financial performance of projects
- Acquire the skills to highlight the key commercial aspects of documentation
